

Learn More

October 27, 2007

Dear Valued Friends,

Please accept this letter as means of making an announcement.

Triune Health Group, developed by Disability Management Network (DMN), has made its official debut on October 7, 2007. As company owners, my wife Mary Anne and I are very happy to announce this significant event in the history of our company.

It was seventeen years ago, on October 7, 1990 that DMN was formed. From small beginnings, we have grown with your help into an organization that now serves over ten thousand individuals each year.

DMN began as a Vocational Rehabilitation and Medical Case Management company. Built on a foundation of excellence, and based on our balanced commitment to Service, Quality, and Results, we have grown steadily over the years. The DMN logo, with its three interlocking circles has always been a symbol of this balanced commitment. It has also included at its very core a respect for the dignity of life of each individual; an understanding that has led to great results and exciting growth in serving our customers.

It was 10 years ago, in response to our customer's needs, that significant expansion took place when we added our Occupational Health products to our primary business of Case Management. Several years later we expanded into Injury Prevention and Employee Wellness and most recently, Telephonic Case Management. We have also introduced a comprehensive Employee Assistance Program, which offers our customers another tool for success. Our services help build stronger companies by building healthier individuals.

With all of these service enhancements, it only made sense to give a name to who we have become as a total health network. We are now Triune Health Group.

Our new identity reflects what you have asked us to provide. Our primary business will remain Medical Case Management and Vocational Rehabilitation services which will continue to focus on the rebuilding of lives and individuals getting back to work. In addition to this, we will meet our customer's needs for injury and disease prevention through employee wellness.

Our new logo incorporates the same three circles within its foundation, assuring you that we are the same company that you have come to trust. The addition of the triangle reflects the expanded services which support the dignity, wellness, and balance of the total person. At Triune Health Group we are building stronger companies by building healthier individuals.

As we continue to move forward, we want to thank you for your years of trust and support. We are very grateful. Be assured of our continued commitment to your success.

Sincerely,

Christopher J. Yep M.S., C.R.C., L.C.P.C.

President
